

Wireless Configuration Instructions for Blackberry

These instructions will configure your wireless connection to the RU-Secure wireless network. It will allow you to authenticate and browse using a higher level of security and protection. It will also automatically log you in after your first connection – no need to login and authenticate every time you come onto campus.

NOTE:

1. These instructions are for specific [Blackberry phone models](#) that are Wi-Fi capable. For more information please visit:
http://na.blackberry.com/eng/atagance/networks/#tab_ddetail_subtab_wifi
2. Due to the customization of layouts and designs in the Blackberry O/S, and the ability to move/hide icons, this document will mainly be a guide for connecting to the RU-Secure wireless network. The look of the icons, menu's and screenshots in the following instructions may not be identical to the layout on your own personal device. The setting names and the settings themselves will however be identical across all Blackberry's.

Instruction

Diagram

1. From your main home screen click your Blackberry Button. 

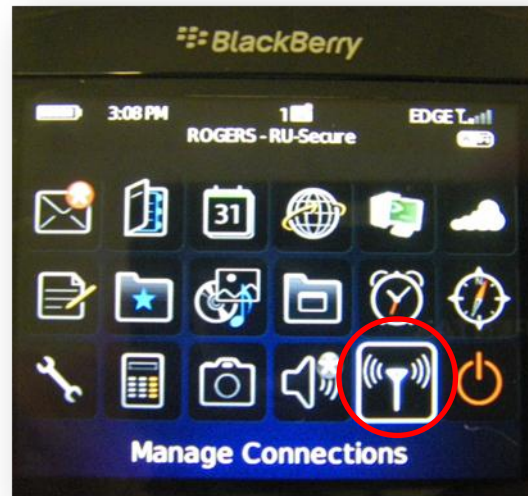

In some new models, eg. Blackberry Torch, pressing the button  may show another menu. Please select 'Open Tray' option of this menu to go to the main menu screen shown in step 2.

Instruction

Diagram

- Find your Wi-Fi icon, which is titled **"Manage Connections"**, and open it by clicking enter or push in on your trackball.

- In the **Manage Connections** window scroll down to **Set Up Wi-Fi Network** and click Enter or push in on your trackball.

Instruction

Diagram

- Click **Scan for Network** in the newly opened window.

(Some new models skip directly to step 5)

- In the new window, scroll around to find the **RU-Secure** network and click enter or push in on your trackball.

Instruction
