

Wireless Configuration Instructions (Mac OSX – LION)

These instructions will configure your wireless connection to the **RU-Secure** wireless network. It will allow you to authenticate and browse using a higher level of security and protection.

Instruction

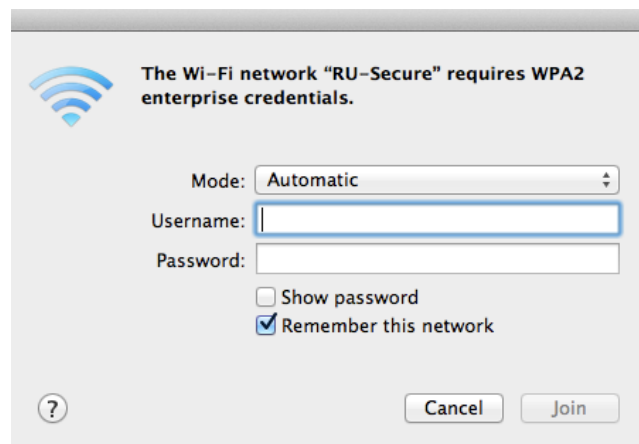

Diagram

Configure Wireless Connection

1. Click on AirPort to see a list of available networks. Click **RU-Secure** network to connect.

2. When prompted **The Wi-Fi network “RU-Secure” requires WPA2 enterprise credentials**, type in your username and password:
 - a. **Students/Faculty:** Use your **my.ryerson** credentials
 - b. **Staff:** Use your **CFAPS** credentials
3. Click **Join**.

Instruction

Diagram

- From the **Verify Certificate** window, ensure that the certificate is for the **RU-Secure** network and that it is authenticating to **rad.ns.ryerson.ca**.
- Click **Continue**.

- If you are prompted to enter your administrative password, enter it and click **OK**, to apply the certificate.

You will now be connected to the **RU-Secure** wireless network. Your credentials are now cached and you will automatically be authenticated when you are within range of the wireless signal.

*****PLEASE NOTE*****

Once you have successfully connected, Lion does **NOT** have the ability to prompt you for your credentials each time you wish to connect. You will automatically be logged on each time you are within range of the RU-Secure signal.

In case you wish to delete the RU-Secure profile, please follow the remaining steps to remove them. **DO NOT DO THIS** if you want to stay connected to RU-Secure.

Instruction

Diagram

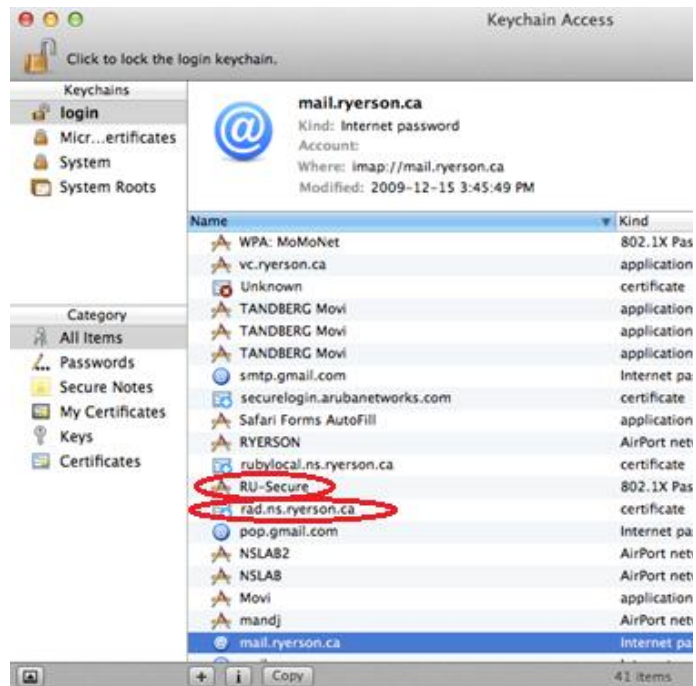

Delete RU-Secure Profile

1. Click on Spotlight at the top right of your screen.
2. Click the magnifying glass and type **keychain**.
3. Click **keychain**.

4. From the **Keychain Access** window find and delete
 - a. RU-Secure
 - b. rad.ns.ryerson.ca.

Note: You may be prompted to enter your administrative password to complete the deletion.

5. When the above two items are removed from your keychain, disconnect from RU-Secure and you will not longer be automatically connected. To regain access to RU-Secure go to Step 1 in **Configure Wireless Connection**.
