

## Graduate Program in Chemical Engineering MEng Project Guidelines

---

The student is expected to commence working on the major project as soon as possible. Registration in the course CE8001 Master's Project will commence when the project work begins. The student is required to present a written project proposal to the Supervisory Committee for review and comments. The proposal should not normally exceed 20 pages.

On completion of the project, the results are submitted in a technical report format to the supervisor and then to an Examining Committee, which an oral presentation is made for assessment and grading of the project and the report. The student is expected to provide evidence of competence in the carrying out of a technical project and present a sound understanding of the material associated with the research project. The student should consult with the supervisor on the contents of the project report and schedule of revision(s) before starting to write. The body of the project report should not normally exceed 50 pages. Additional information on the Oral Examination may be found at [Project Oral Examination Procedure](#) and [Project Oral Examination Scheduling Request](#).

**Lab safety:** Students working in an experimental or computer lab must familiarize themselves with safety requirements, which may be found at the [Centre for Environmental Health & Safety Management](#) website. In addition, students are not permitted to commence lab work until they have: (1) passed the online WHMIS quiz at [www.river.dmp.ryerson.ca/cehsm/whmisquiz/](http://www.river.dmp.ryerson.ca/cehsm/whmisquiz/) (the student is required to give a copy of the certificate indicating success completion of the WHMIS quiz to the Program Administrator, Ms. Leah Stanwyck), (2) obtained copies of the necessary MSDS forms and placed them in the lab, and (3) discuss laboratory safety procedures related to their research work with their supervisors.
