

Cisco Jabber - Windows

Cisco Jabber is an application that allows you to make and receive phone calls on your computer and mobile device.

Quick Access:

[Step 1: Download Cisco Jabber for Windows](#)

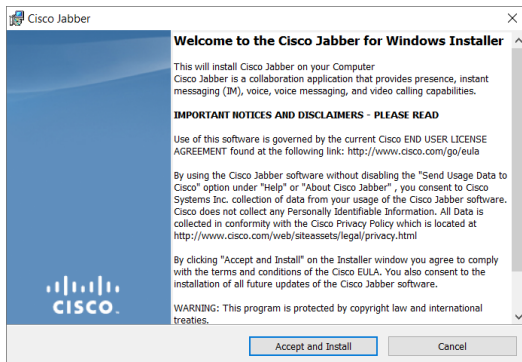

[Step 2: Install Cisco Jabber for Windows](#)

Step 1: Download Cisco Jabber for Windows

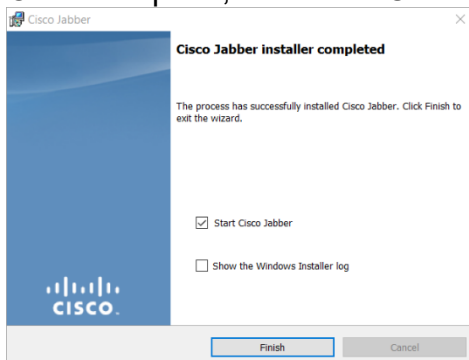

1. Download the Cisco Jabber client for Windows with the following link:
[CiscoJabberSetup.msi](#).
2. On the Ryerson login screen, enter your my.ryerson username and password. Click **Log in**.
3. On the File Download screen, click the **Save** button to save the zip file to a location where you can easily find it such as your desktop or your Local Disk (C:).

Step 2: Install Cisco Jabber for Windows

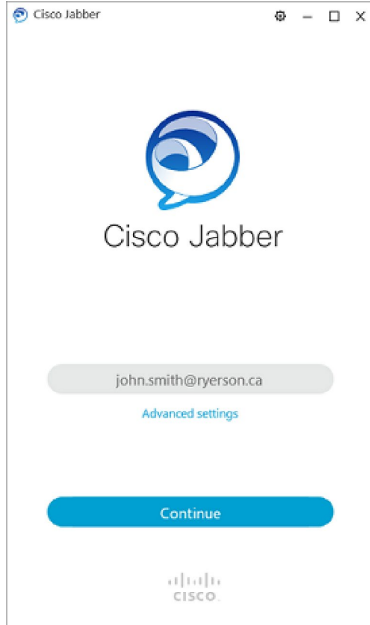

1. Once the file has downloaded, select and install the CiscoJabberSetup.msi file. When prompted at the Security Warning screen, select **Run**.
2. Read the end user license agreement and terms of service and select **Accept and Install**.

3. Once complete, select **Finish**. The application should now open.

4. On the initial Jabber screen, enter your my.ryerson username followed by “@ryerson.ca” and click **Continue**. For example, you would enter your.name@ryerson.ca.

5. Next, enter your my.ryerson username and password and select **Sign In**. In this instance, you would enter “your.name” and omit “@ryerson.ca”.
