Financial Analysis, GDip (Type 3)

The primary objective of the Professional Master's Diploma in Financial Analysis is to produce graduates with higher order knowledge and critical thinking skills essential to addressing professional business problems in finance and investing. Participants in the financial services sector will benefit from this program, which leads to career positions such as financial advisor, financial analyst, portfolio manager, and risk manager, among others. Courses include: Fixed Income Securities, Advanced Portfolio Management, Advanced Investment Management, Derivatives, and International Finance. The Professional Master's Diploma in Financial Analysis will provide a pathway for qualified students to continue their education at a level that will prepare them for further graduate study (e.g., MBA) and/or professional certification (i.e., Chartered Financial Analyst).
