

Learning Outcomes

LO	Description
LO1	Identify, analyze and critically examine theoretical frameworks and models of planning including the forms, scales, settings, processes and factors of change in human settlement.
LO2	Understand the histories and theories of planning principles and practice in Canada and internationally. Critically appraise past practices that have contributed to colonialism, systemic racism and ecological disruption.
LO3	Describe, discuss, critique and improve land-based planning in relation to the legal, political, and institutional frameworks of planning. Apply legal, political, and institutional frameworks for improvements in land-based planning.
LO4	Apply principles of sustainability, equity, diversity and inclusion in land-based planning, urban design and infrastructure planning, including planning decisions that involve public finance and economic interventions.
LO5	Develop contextual and collaborative planning processes using existing and innovative methods of visioning, community engagement, goal-setting, problem-framing, information gathering, analysis, and deliberation.
LO6	Create and improve regulatory and financial/fiscal tools to inform the design, development, management, monitoring and evaluation of projects.
LO7	Gather, analyze and interpret quantitative, qualitative and visual information at various geographic scales, and communicate clearly through design scenarios and plans.
LO8a	Identify and incorporate diverse and equity-denied peoples and diverse values in design, planning and policy making. Actively engage with interested, affected communities connected to the land, including rights and Treaty-holders, place-keepers, public, private and non-profit organizations, and individual actors, in the planning process.
LO8b	Facilitate, negotiate, mediate, and resolve competing interests towards conflict resolution in planning, design and policy making.
LO9	Deliver effective oral, written and visual presentations and publications. Apply universal design principles to support clear, accurate, concise and accessible communication.
LO10a	Investigate, recognize and implement strategies to manage the inherent complexities and uncertainties of change, which meet the demands of professional conduct in the urban planning field.
	Recognize ethical dilemmas in planning, research, and professional activity in order to make more ethically

LO10b

informed decisions and resolve ethical dilemmas.
