

New

Specialized MA Stream in Film Preservation

Ryerson's internationally renowned MA in Photographic Preservation and Collections Management will introduce a Film Preservation specialization in September 2013 – the first of its kind in Canada. This exciting new program brings together film historians, curators and archivists to deliver a unique curriculum. Students will be trained to care for, preserve and manage moving image collections and will be prepared to meet the challenges faced by institutions that maintain and develop them.

Contact us to find out more or to apply for September 2013.
