

### Supervisory Committee Approval Form

The Supervisor, after consultation with the student, will recommend to the Program Director the appointment of a Supervisory Committee of at least three persons, composed of the Supervisor and two additional faculty members, one of which should be from our graduate program. Where appropriate, a member from outside the student’s program (for example, an expert professional in the field) may be recommended to the Supervisory Committee and is subject to approval by the Graduate Program Director.

The supervisor will be the Chair of the Supervisory Committee. The Supervisory Committee should be established before the end of the student’s first term after initial registration.

Please note: A supervisory committee member that is not member of the School of Graduate Studies cannot be a voting member in a thesis exam without approval of the Dean of the School of Graduate Studies.
