RE-THINKING AGEING 2016:
PRELIMINARY PROGRAM
AGENDA

The rapidly ageing population presents Canada with a growing proportion of seniors with an equally diverse set of needs, priorities, and factors that influence their ability to stay as healthy and independent as possible. How our society prepares to meet the financial, social, health, housing and caregiving needs of older Canadians must be considered with the aim of becoming the best nation to grow up and grow old in.

The National Institute on Ageing’s Inaugural Conference will bring together experts, thought leaders, practitioners and delegates to learn, share, and brainstorm key ideas and actions for advancing the four pillars of our recently proposed National Seniors Strategy (NSS). This dynamic two-day conference will frame the dialogue around each pillar starting with an expert panel discussion, followed by related workshop sessions that feature interactive presentations and discussion.

### PANEL DISCUSSION

**PILLAR THREE: CARE CLOSER TO HOME**

We need to ensure older Canadians are receiving the right care, in the right place, at the right time, by the right provider. This panel will share their insights on how we can ensure older Canadians have access to high quality person-centred home and community care, or long-term care. This session will also illustrate the need for older adults to communicate their plans and preferences for future health and personal care, including palliative end-of-life services. Some emerging models will be shared for customizing care to the needs of patients and caregivers, along with the changing scopes of clinical practice, to enable better care, closer to home.

**MODERATOR:**

**W6 CONSUMER-DIRECTED VS. PROVIDER-DIRECTED CARE**

With a growing interest in consumer-directed care, what are emerging and innovative models in Canada looking to support consumer-directed vs provider directed care and both and how well do these models address the needs of both older adults and their caregivers?

What are the proven supports or pre-conditions required to enable a person or caregiver’s success with a self-directed model, and what supports are required to enable this?
### PANEL DISCUSSION

With growing number of Canadian taking on caregiving roles, how can we ensure that the family and friends of older Canadians who provide care for their loved ones are best acknowledged and supported?
