

MASTER OF NURSING – COURSE STREAM

CROSS-LISTED COURSES

A number of courses within the Yeates School of Graduate Studies have been cross-listed. This means that with permission, and based on availability, a student enrolled in the Master of Nursing program may take up to **ONE** cross-listed elective from a participating Ryerson Graduate program.

To determine your eligibility for registration consideration in a cross-listed course from another participating Ryerson Graduate program, you must first speak with the Master of Nursing Program Administrator.

Listed below are the names of the participating Graduate programs and the cross-listed courses that may be of interest to students enrolled in the Master of Nursing program:

Immigration and Settlement Studies Program

IS8932 Immigration and Health

Newly arriving immigrants are, on average, healthier than native-born Canadians. They do not always stay that way. This course will address personal and social determinants of physical and mental health, and paradigms used to explain the health status of immigrants. Culturally appropriate health care requires institutional change, but this has been slow in coming. We will examine why, despite universal coverage, Canada's health care system is still failing to provide equitable services for immigrants and refugees.

MBA Program

MB8004 Acctng

Topics include the role of GAAP, balance sheet, income statements and cash flow statements, the concepts of retained earnings, depreciation, receivables, inventory, amortization, deferred taxes and goodwill. It examines accounting models to improve managerial decision making including the Cost-Volume Profit model, Activity Based Costing, Economic Value Added, transfer pricing, overhead allocation and Balanced Scorecard. Strategic issues such as organizational learning, control systems and openbook management are examined with a global perspective.

MB8005 Finance

This course provides the necessary principles of finance for the manager of an enterprise in the global environment. This course examines from a global perspective, shareholder wealth maximization, the analysis and interpretation of financial statements, ratio analysis, the time value of money, discounted cash flow analysis, valuation of different financial assets, value of equity, interest rate analysis, the value of debt, and bond valuation.

MB8006 Economics

This course develops the fundamental tools of economic analysis that are essential for understanding global markets and making managerial decisions. The economic relationships between growth and inflation are examined as well as credit, interest rates, and government fiscal and monetary policy. International input and product markets, foreign direct investment, multinationals, mergers and acquisitions, as well as the market determination of exchange rates and interest rates are considered.

MB8003 Marketing- introduction to business

MB8106 Managing in a Diverse World

This course develops competencies in managing a global workforce. Specific topics include the behavioural impact of cultural differences, alternative approaches to organizational structure, cross cultural communication challenges, management of diverse groups, leadership and employee motivation techniques for global managers, conflict resolution across cultures, approaches to ethics and social responsibility in different cultures, global recruitment, selection and employee repatriation issues.

MB8708 Project Management

This course focuses on how projects contribute to the strategic goals of the organization. The linkages for integration include the process of selection of projects that best support organizational strategy and all the technical and managerial processes to complete those projects. The goals for prospective project managers are to clearly understand the role of project in their organizations and to master project management tools/techniques and interpersonal skills necessary to orchestrate projects to completion..

MB8711 Negotiation and Conflict

The primary objective of this course is to help students develop the sophistication to analyze bargaining and conflict relationships and to learn (through class discussion, bargaining simulations and self assessment) about their own individual bargaining style. The course explores the process of collective bargaining as it is currently practiced by organizations and their unions, as well as the major concepts and theories of the psychology of bargaining and negotiation that this process embraces.

Nutrition Communication Program (MHSc)

NC8101 Epidemiology Nutrition Research/Interpretation

This course provides a survey of the most frequently used elements of biostatistics (odds ratios, relative risk, meta analysis, etc.), demography, informatics, methodology (study design elements), and epidemiology (classical as well as clinical) used to establish nutrition practice and policy. Emphasis is placed on tools used to convey information about dietary risk, risk management. This course provides opportunity for students to critically evaluate and interpret epidemiologic reports in nutrition literature for methodological and analytical soundness.

NC8102 Nutrition and Health Behaviour

Using an interdisciplinary framework, current theories and concepts of health, nutrition, health behaviour and behavioural change in individuals, practitioners, and organizations will be explored. An understanding of the social psychological processes that may facilitate or impede health maintenance in individuals and populations will be developed. Behavioural change practice and research will be critically examined within a systemic, ethical and personal context.

NC8103 Social Dimensions of Nutrition Communication

This course begins by establishing the social contexts and constructions within which nutrition communication occurs through seminar discussions, writing, and readings on identity, diversity, and ethics. We examine the evolution of and challenges inherent in nutrition communication as well as the dynamics of interpersonal communication through relational, biographic, and narrative models. We conclude by acknowledging critical social justice issues inherent in nutrition communication and their application to professional practice.

NC8201 Food and Nutrition Policy

This course provides an overview of contemporary food and nutrition policy issues and debates. It discusses criteria for effective policy and the role of institutions and stakeholders in the policy development process. Students will develop an analytic framework for evaluating policy decision-making, outcomes and impacts.

NC8204 Risk/Benefit Analysis

This course focuses on risk analysis, assessment and communication in nutrition and food. Students will discuss the risks and benefits of themes in public health with implications in Canada and internationally, such as the use of food additives; links between diet and chronic diseases; foodborne illnesses and environmental contaminants. Students will examine risk assessment methodologies; risk perception by individuals, groups and the public-at-large; communication strategies and methodologies used by stakeholders: industry, government, and nutrition/food professionals.
