

The Rock Cycle Worksheet

1. Complete the following table to connect your chocolate model to the rock cycle.

Sedimentary Rock	
Draw a picture of what your Sedimentary Rock looks like below:	Describe its characteristics.
	What did you do to change the sediment into sedimentary rock?
Metamorphic Rock	
Draw a picture of what your Metamorphic Rock looks like below:	Describe its characteristics.
	What did you do to change the sedimentary rock into metamorphic rock?

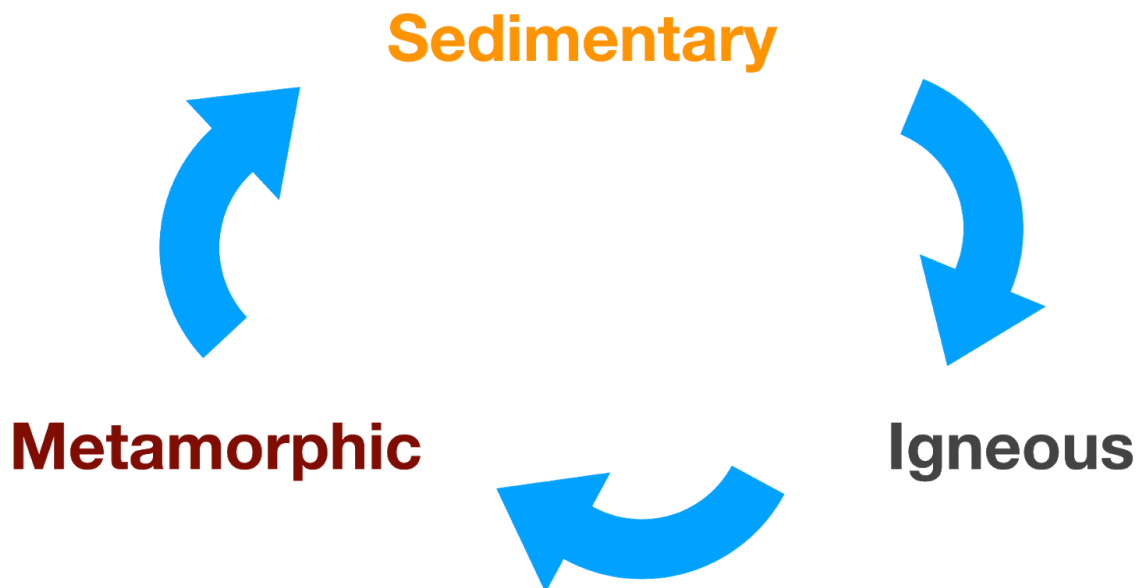

Igneous Rock

Draw a picture of what your Igneous Rock looks like below:

Describe its characteristics.

What did you do to change the metamorphic rock into igneous rock?

2. Next, can you name some processes or conditions needed to transform each rock into the next rock based on the arrows provided below?

3. The arrows in the rock cycle below are reversed. Can you name some processes or conditions needed to transform each rock into the next rock based on the arrows provided?
