SMA2 Potential New Programs

- Surveyed deans, chairs and directors in November and December
- Considerations for inclusion:
 - Is new funding required?
 - Can new program meet all approvals by Fall 2018 and be launched by Fall 2019 (Senate, Board, Quality Council, MAESD)?
 - Does it meet the Government's societal need, student demand, uniqueness and fit with institutional mission criteria?

Financial Sustainability Metrics

➤ **Net Income / (Loss)**

Ratio: Measures the percentage of revenues that contribute to net assets. The objective of this ratio is to track trends in institution's net earnings.

➤ **Net Operating**

Revenues Ratio: Operating cash flow as a proportion of revenues. This ratio provides an indication of the extent to which institutions are generating positive cash flows in the long run to be financially sustainable.

➤ **Primary Reserve Ratio:**

Number of days an institution could function using only its resources that can be expended without restrictions. This ratio provides an indication of the university's financial strength and flexibility.

➤ **Interest Burden Ratio:**

Proportion of total expenses supporting the annual cost of servicing debt. This is an indicator of debt affordability, as it examines the percentage of total expenses used to cover an institution's cost of servicing its debt.

➤ **Viability Ratio:** Proportion of long-term debt that could be settled using only resources that can be expended without restrictions. This metric provides an indication of the funds on hand to settle long-term obligations.
