

RECIPE: Crafting the 'Secret Sauce' to Social Justice in Social Innovation

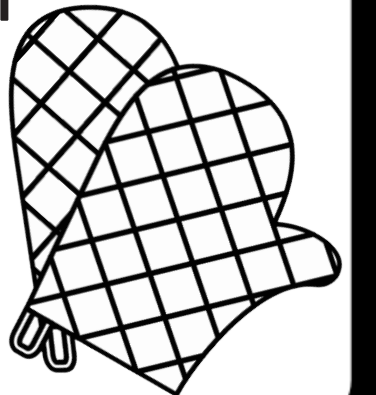

Collaboration & Narrative

- Collaborate with other teams for open, critical dialogue, and challenge your conceptualization of social innovation.
- Challenge your narrative: Which voices are centred? What endeavours are recognized?

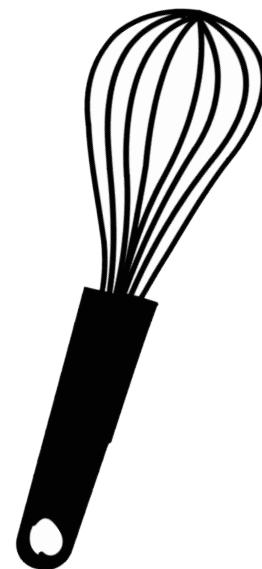

Reciprocity & Voice

- Give new partnerships the time to grow and develop mutually beneficial relationships.
- Centre student voices in program development to create supportive and open spaces for dialogue.

Creativity & Adaptability

- Be creative in considering academic and community partners.
- Be adaptable in meeting student and partner needs, focussing on the comfort and security of students throughout their learning journey.

Suggested Spices!

- Consider challenging beliefs which uphold the status quo, season with tension, and intersperse optimism.
- Any sauce will need to be made suited to contextually specific palates and relationships. Add your own ingredients!
