Student Voices

"I recommend Supported Learning Groups because they were helpful and provided extra help beyond the lecture. Being led by a fellow student was also helpful as it enabled discussion and created a relaxed atmosphere where learning was possible."

- Ryerson student

"Overall, this was a great Writing Retreat. I enjoyed being around fellow hard-working students engaging in their academic pursuits. The social support itself made a world of difference in my attitude toward engaging with my thesis work. Thank you for supporting students with this retreat!"

"I have made a great progress not only in my MRP direction but also in a way of changing my writing habits and approach."
